

The Arizona State Board of Pharmacy received funding\* for integration allowing healthcare entities large and small to connect to the Controlled Substances Prescription Monitoring Program (PMP) through their current electronic health record system and the PMP Gateway – rather than having to login separately to the PMP – making the PMP more efficient and easier to use.

\* Note: There may be a charge to the healthcare entity from the EHR vendor to add the interface.

Healthcare entities – large and small – who are interested in connecting to the PMP more efficiently should fill out the online integration interest form:

<https://pharmacypmp.az.gov/integration-interest-form>

The PMP Gateway requires prescribers to have registration in the PMP at <https://arizona.pmpaware.net/login>. To find out whether your prescribers are registered, contact [pmp@azpharmacy.gov](mailto:pmp@azpharmacy.gov).
